

# Pre-School Teacher's Training

## Introduction

We all know preschool education deals with the most delicate age of learning. An educator's duty does not end with imparting education to a child but the educator also encourages, guides, inspires a child to develop his/her thinking power, and eventually loves learning. The overall responsibility of a preschool teacher is to enable a child a smooth transition from Preschool to Primary education.

As Aristotle quoted, "The one exclusive sign of thorough knowledge is the power of teaching". Since a teacher is capable of taking a hand, opening a mind, and touching a heart, teaching is treated to be one of the most respected professions in the world. Not only the freshers but also the teachers who are having problems in holding classes, require training. This **FREE of COST** training makes one capable of conveying their knowledge most effectively and innovatively.

## Programme Objective

After completing this training, participants will be able to develop new teaching strategies which will bring back the interest of their students in the classrooms and encourage learning.

## Programme Highlights

1. Teaching vs. Facilitation
2. Theories of and Approaches to Child Development and Learning
