

# Vidhya— RAY OF HOPE

## Target Audience

Undergraduate Students (depending on the criteria)

## Project Details

Vidhya provides financial scholarships to students who are both, deserving and needy to help them to pursue the higher education of their choice. The scholarship recipients are also groomed through various interventions at appropriate time/s, to make sure they excel in the future.

Higher education is getting increasingly prohibitive in India for its high cost each passing year. Even the middle class or upper-middle-class find it difficult to bear the expenses of higher education. For the economically weaker section of the society to get their children in reputed colleges for higher education is a farfetched dream.

Despite scoring good grades in high school, students from economically weaker sections either discontinue education or seek some short term vocational or other courses; consequently, many bright students do not get an opportunity to show their potential, merely due to financial constraints. Hence, there is a need to subsidize these students' education so that no bright student is deprived of the opportunity to showcase their potential.

Based on application forms, students are shortlisted based on their credentials and their financial background. Shortlisted students are called for personal interviews along with their parents.

Their financial eligibility is assessed in the interview and based on this and their credentials, the amount of scholarship is determined. Future academic targets are also set and mutually agreed upon to ensure that the students continue to excel in their studies.

Every year, an academic result of the beneficiary is reviewed to ensure that only the bright and deserving students continue to get the benefit of the scholarship.

## Project Highlights

- Financial support for academics
- Sensitization of educators
- Community involvement

## Our reach

Valsad, Bhavnagar and Amreli district

## Registration
